

Level 4 Advanced Canine Aquatic Treadmill Techniques

Canine Therapies Academy

This qualification is a stand-alone unit aiming to progress a learners' clinical competencies and treatment techniques when using an aquatic treadmill, to achieve further positive outcomes for the canine patient. It will enable the learner to develop their therapeutic toolbox of treatment techniques to offer a more comprehensive service.

Learners will link knowledge and understanding of canine biomechanics and functional anatomy to treatment techniques, assisting them to devise a specific programme to meet each dogs' specific mobility needs.

This unit will cover the following subject areas:

- Advanced aquatic Treadmill techniques;
- Canine gait assessment and analysis
- Canine functional anatomy and biomechanics
- Clinical reflection and evaluation

The following prior experience and requirements are mandatory:

Either:

Optional unit of Hydrotherapy Treadmill Therapy for Small Animals from the SEG Level 3 Diploma in Hydrotherapy for Small Animals

Or:

Optional unit of Introduction to Aquatic Treadmill Practice from the SEG Awards Level 3 Certificate in Canine Hydrotherapy
